

2019.7.16実施 カンボジアワークショップ アンケート集計結果

1. 回答者の所属先（該当者数）：

食品製造・生産業（8）、カンボジア政府（15）、日系食品卸業（1）、FAO（1）、JICA（2）

2. NJPPP に期待すること：

Promote the use of qualified and safe products.

Provide more knowledge on health issue and nutrition.

Provide technical assistant, material, equipment.

Provide support national sub-committee for food fortification.

Organize workshop which involve private sectors and workers.

Organize workshop for sharing experiences from Asian countries.

To support nutrition projects both technical and budget.

To have specific plan, monitoring and evaluation.

Cooperate with related institutions/government institutions.

Want to attend Nutrition Summit which will be held in Japan in 2020.

I would like NJPPP collaboration with Ministry of Labor and vocational training especially occupational health department which is currently working closely with workers related to safety and security at the workplace.

今後も同様もしくはシリーズで関連のセミナー等を実施していただき、ネットワークの強化に資するものとしていただきたい。

栄養教育の推進。

3. ワークショップの感想：

Satisfied and got more knowledge from the project.

I am very interested. I would like all Cambodian people consume fortified food.

It is very important. We got more knowledge about nutrition.

It is very important workshop which promote the improvement of nutrition status at the workplace.

Suggesting to have this kind of workshop in the next future.

Organizing problem, slide presentation

Cooperative and supportive.

Good because the workshop shared good experience to participants to know/understand more about rice fortification which is the source of energy around 70% for each individual.

Please think about the taste of the product. If it affects to the taste, the company will not involve in the project.

Wishes the project success because it is related to human health

Development partner got success in implementation.

The topic should be focused on school food from primary to secondary school.

簡易的な食育を初等教育に導入しては？と思いました。

母子手帳を今後 QR コード化して導入することも検討しているため、「ICT 技術を利用した健康教育」部分はとても参考になりました。今後 PPSEZ の日系企業と共働で健康教育を実施することも検討したい。
